

Web-enabled Fulfillment and Inventory Management Solutions

Increase the efficiency of your business and improve service to your customers with PBB's state-of-the-art e-Fulfillment solutions. Whether you're operating in a Business-to-Business (B2B) or Business-to-Consumer (B2C) environment, or need an online application to help you manage warehousing and inventory, PBB provides online tools to fill orders quickly, accurately and efficiently every time.

Seamlessly interfacing PBB's Warehousing & Distribution network of facilities with leading-edge online inventory management information systems, e-Fulfillment harnesses the power of the Internet to manage your supply chain needs.

Why Use PBB's e-Fulfillment Service?

- ▶ Faster order processing produces greater customer satisfaction levels and fulfillment times
- ▶ Reduced paperwork, lower labor costs and less product handling
- ▶ Greater order accuracy and processing - less re-keying of data with preloaded database of SKUs
- ▶ Real-time data and inventory tracking allows for precise up-to-date management reports, fewer back orders and reduced product shortages
- ▶ Access front or back end of system through an easy to use Web-enabled secure interface from anywhere in the world
- ▶ Access to PBB's strategic network of 70 offices at key points across North America with 7/24/365 service

An e-Fulfillment Solution for Every Need

B2B Solution

A Web-based order entry system that allows partners throughout your entire supply chain to procure goods inventoried at a PBB Warehousing & Distribution facility. Allows you to process Business-to-Business transactions and manage related inventory via the Internet.

B2C Solution

A secure Web-based storefront service ideal for e-tailers operating in a Business-to-Consumer environment. A convenient and reliable solution for reaching new markets and generating online sales through a credit card payment gateway. Integrated warehousing, inventory management, order fulfillment, end delivery and return logistics services ensure superior customer service and cost efficiency.

Virtual Warehouse Solution

Interface PBB's Web-enabled inventory management system with your existing warehouse facility. Utilize **Virtual Warehouse** to effectively and efficiently manage your warehouse and distribution functions online, without having to invest in costly up-front inventory management information systems software.

FTP Solution

A cost-effective alternative to expensive EDI technology. Interfaced with your procurement system, it allows you to automatically transmit orders for fulfillment to a PBB Warehousing & Distribution facility through Internet-based File Transfer Protocol (FTP).
